

PRESSURE RELIEF VALVES

Dual-Stage Pressure Relief Valve

- Industry first Dual-Stage Pressure Relief Valve (PRV) engineered specifically for pipe plugs
- Precision open and close
- Wide open when pressure is released
- Resets quickly and securely at or just above inflation pressure
- Internal filter assemblies prevent debris from causing damage or preventing reset
- Made of aluminum and stainless steel
- Field replaceable
- Left-hand threads for tamper resistance and to prevent misuse
- Prevents against over inflation and under inflation
- Overcomes high CFM air compressors

PRESSURE RELIEF VALVES

| PART NUMBER | PRODUCT DESCRIPTION |
|-------------|---|
| 440078 | Pressure Relief Valve (PRV) for Plugs with 2,5 BAR Inflation Pressure |
| 440088 | Pressure Relief Valve (PRV) for Plugs with 1,5 BAR Inflation Pressure |
